## THE EXPERIENCE OF A LIFETIME

Designing and building a finely crafted home can be one of the most rewarding experiences of a lifetime.

## THE PERSONAL TOUCH

We know that designing your home is a very personal experience. We believe that the most important element in achieving a great result is listening to the owners and custom-tailoring the home to their individual needs.

### Working Together

Our uniquely personal approach of creating the design in front of our clients promotes a free exchange of ideas that are immediately expressed in design sketches.

This interaction between architect and owner makes refinement of the design move quickly.

## DETAILS BUILD CHARACTER

### The Extraordinary Home is in the Details

Detail drawings provide the contractor and craftsmen with specific instructions as to shape, scale and materials used to build the architectural elements that determine a home's interior and exterior character.

### Aesthetic Decisions

Without detail drawings, sub-contractors are forced to make hundreds of aesthetic decisions during the construction process. The design the client wants may not be accurately achieved.

### Basic Detail Drawings

To insure that the home is built as designed, we recommend a group of enlarged exterior details in the construction drawings of every home.

### Additional Detail Drawings

To protect their dream, most clients request additional detail drawings of the interior elements that are particularly important to the character of their home.

## CONSTRUCTION OVERSIGHT

Construction oversight services eliminate the misinterpretations that often occur during construction and insure that the home we design for you is the home that is built.

**Thorough Planning, Clear Communication** - Construction oversight services provide thorough planning, proven systems, clear communication and unbroken supervision from the first design meeting until your home is complete.

**Faster Completion** - Close coordination between design and construction keeps the work moving by addressing essential design issues before they become construction problems.

**Lower Project Cost** - Close communication with the construction team helps maintain a high level of productivity and identify potential problems before they occur, resulting in lower project cost.

**Achieve the Look You Want** - Regular on-site visits allow us to review recently completed work and make key aesthetic suggestions on upcoming phases of construction.

**Consistent High Quality** - Coordinating interior and exterior details, materials, and construction methods with your general contractor, landscape architect and interior designer insures consistent quality throughout all phases of construction.

**Owners Advocate** - Should a misunderstanding arise, we act on the owner's behalf in all design and construction issues.
